February 25, 2026

¹ Starting with reference year 2024, an establishment engaged in the extraction of sand, gravel or stone as a secondary activity is excluded from the survey if the production value is less than \$100,000. For Quebec, the Institut de la Statistique du Québec excluded establishments with one employee or less starting with reference year 2024.

³ Historically NRCan published ilmenite concentrates as "Ilmenite". Starting in reference year 2019, the published data changed to recoverable ilmenite to be consistent with Statistics Canada's publication.

⁴ Starting in reference year 2019, iron ore is separated into iron, concentrates and iron, agglomerates to be consistent with Statistics Canada's publication.

⁵ The platinum group includes iridium, palladium, platinum, rhodium and ruthenium.

⁶ Starting in reference year 2019, titanium dioxide is reported as a metal to be consistent with Statistics Canada's publication. Refer to the non-metal 1990 – 2018 tables for historical values.

⁷ Starting in reference year 2019, potash quantities are published as muriate of potash (MOP) and potassium oxide (K₂O). Shipment values are only published for muriate of potash (MOP) to avoid duplication.

⁸ The salt group includes fine vacuum salt, in brine salt and rock salt.

⁹ Starting in reference year 2019, Clay is a new addition to the aggregates table.

¹⁰ The lime group includes quicklime and hydrated lime.

¹¹ The sand and gravel group includes silica sand, quartz crude and quartz milled as well as gravel (natural/crushed) and natural sand. Starting in reference year 2019, quartz (silica) is included in sand and gravel to be consistent with Statistics Canada's publication.

¹² The stone group includes granite, limestone, marble, sandstone, shale and slate.

¹⁴ Source: Statistics Canada, Monthly Coal Supply and Disposition Survey (Table 25-10-0046-01, <https://doi.org/10.25318/2510004601-eng>). Reported values may vary over time between the Natural Resources Canada and Statistics Canada tables due to data revisions made after Statistics Canada's initial release date.

The sum may not add up to the total due to rounding and previous years may be subject to revisions in the future. Data include shipments by producers regardless of industrial classification.

For definitions regarding data contained in these tables, refer to:

[Techniques Used to Calculate Data on the Mineral Production in Canada, Symbols and Abbreviations](#)
